Experience

Associate Oct 2024 – Sep 2026

Accenture *Bengaluru, IN*

- Partnered with 5+ cross-functional stakeholders to gather requirements and author 8+ BRDs/FRDs, using GenAI tools (ChatGPT/Copilot) to accelerate first-draft documentation and structure requirements — reducing rework from misaligned specs.
- Standardized 10+ KPIs and metric definitions across 3 reporting teams, eliminating conflicting figures in enterprise dashboards and cutting metric-reconciliation time by 10%.
- Owned UAT for 5+ dashboard releases, leveraging AI tools to accelerate test-case authoring (40+ cases) and defect tracking — reducing post-release defect escalations by 10%.
- Built and delivered weekly executive dashboards and presentations to 10+ senior stakeholders, surfacing insights that informed 2–3 key operational decisions per quarter.
- Partnered with engineering to optimize data pipeline processing, reducing dashboard refresh/load time by 15% and improving data reliability for downstream reporting.
- Drove ServiceNow workflow improvements, reducing ticket duplication by 25% and improving query resolution time from 15–25 days to 7–10 days.

Summer Trainee May 2023 – Jul 2023

Intel *Bengaluru, IN*

- Analyzed 5,000+ smartphone market records to identify pricing trends, evaluate product features, and generate insights on competitive positioning.
- Developed analytical models and interactive dashboards to visualize market segmentation and demand trends, enabling data-driven stakeholder reporting.
- Collaborated in a 3-member team to deliver strategic recommendations and complete the project two weeks ahead of schedule.

Projects

Assistive Device for Dementia Patients Jun 2023 – May 2024

- Developed a diagnostic quiz system (150+ users) and a daily reminder tool to assess dementia levels and improve routine adherence.
- Built a clothing guidance prototype and contributed to an assistive solution enhancing usability, independence, and patient quality of life.

Skills

Business Analysis: Business Requirements Analysis (BRD/FRD), Business Process Optimization, KPI Definition, Performance Tracking, Process Improvement, Strategic Decision Support
Project & Stakeholder Management: Stakeholder Management, Cross-Functional Collaboration, Project & Delivery Management, Risk & Issue Management
Programming & Data Analytics: SQL, Python
Business Intelligence & Visualization: Power BI, Tableau
Reporting & Productivity: Microsoft Excel, Microsoft PowerPoint
Tools & Platforms: ServiceNow, Git, GitHub, ChatGPT, Gemini, Microsoft Copilot

Achievements

McKinsey.org Forward Program, McKinsey: Trained in hypothesis-driven analysis, structured communication, and digital tools for early-career professionals.
Data Analytics Essentials, Cisco: Certified in data analysis, visualization, and statistical reasoning using real-world datasets.
Reinvention with Agentic AI, Accenture: Completed internal training on applying agentic AI concepts and tools to business workflows.
IEEE Publication: Co-authored "Assistive System for Dementia Patients using Raspberry Pi and YOLOv5," published during undergraduate studies.

Education

Nitte Meenakshi Institute of Technology Bengaluru, IN

Bachelor of Engineering in Electronics and Communication Engineering *Dec 2020 – May 2024*
